INTRODUCTION

CANSIM[1] (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. The CANSIM Mini Base, a standard subset of data originating from CANSIM, contains approximately 24,000 time series. It is available at various Secondary Distributors* and updated on all working days with the exception of federal government holidays and June 24th. The CANSIM Mini Base Series Directory provides a list of all the series available on the CANSIM Mini Base.

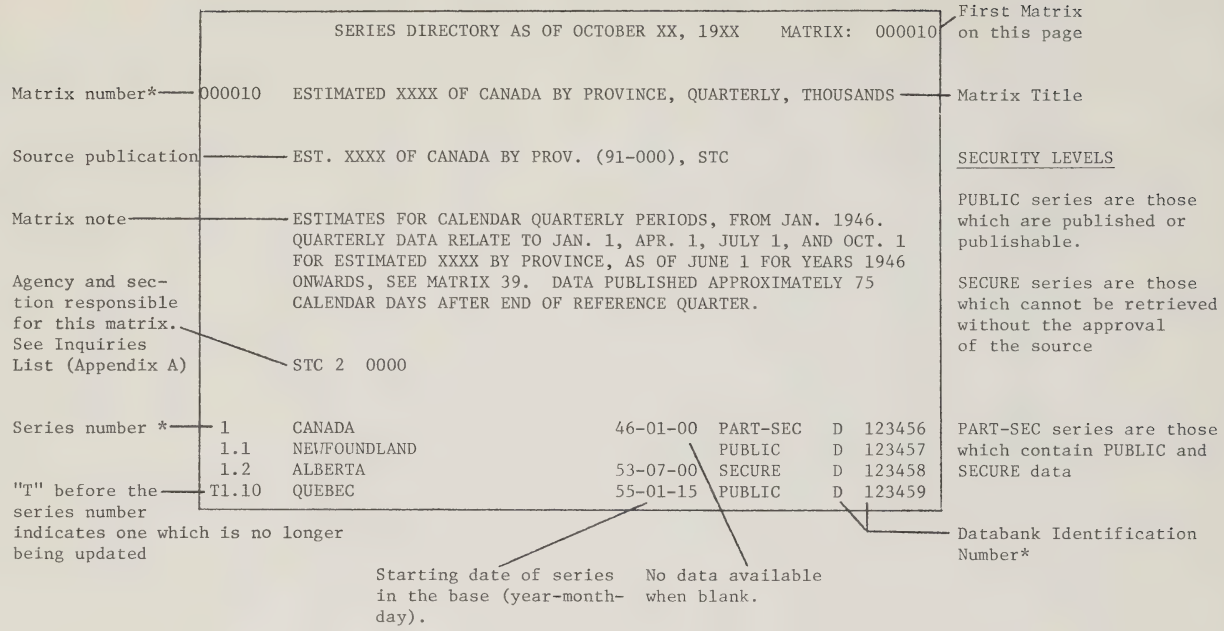
In addition to the CANSIM Mini Base Series Directory, Statistics Canada publishes the CANSIM Summary Reference Index (free of charge) and the CANSIM Main Base Series Directory ($45.00 including amendment service). The CANSIM Summary Reference Index is a summary of the contents of the CANSIM Main Base; the CANSIM Main Base Series Directory provides a list of all series available on the CANSIM Main Base. Both these documents are available for reference at the offices of Secondary Distributors. The CANSIM Main Base currently contains over 200,000 time series; a request may be made to your Secondary Distributor to obtain series, in addition to those on the Mini Base, from the CANSIM Main Base. Usage of these additional series will be monitored and when the content of the CANSIM Mini Base is reviewed (every six months) these series may be added to the Mini Base.

---

* A current list of Secondary Distributors is available from CANSIM Staff, Current Economic Analysis Division, Statistics Canada, Ottawa, K1A 0Z8 or from the Regional Advisors at the Statistics Canada offices located across Canada.

(1) "CANSIM is the registered Trade Mark for Statistics Canada's machine-readable data base. When publishing any data retrieved from CANSIM, the following must be used as the source:

These data originate from CANSIM which is the registered Trade Mark for Statistics Canada's machine-readable data base'."



All Secondary Distributors of the CANSIM Mini Base carry a dummy series with Data-bank Identification Number A100. This series contains three data points: 1) the year, month and day (YYMMDD) of creation of the previous daily update file, 2) the year, month and day (YYMMDD) of creation of the current daily update file, and 3) the time the update file was loaded on the system of the Secondary Distributor. For all series on the CANSIM Mini Base, the updates will be one working day late relative to the CANSIM Main Base.

HOW TO USE THE CANSIM MINI BASE SERIES DIRECTORY

The contents of the CANSIM Mini Base are grouped by subject into 13 Sections (see Table of Contents for list of sections). Each section provides a summary of the Matrices which pertain to a particular subject (i.e. Population, Prices, Construction, etc.). A "matrix" in CANSIM is equivalent to a "table" in a publication; a "matrix" contains a group of related time series. Following the 13 sections, the Matrix Numbers are listed in ascending numerical order.

Let us take an example:

You are looking for the All-Items Consumer Price Index for Canada (1971=100), monthly. The Table of Contents will indicate that Prices is Section 2. In Section 2 you will find that the series you are looking for is in Matrix 428. Now turn to the list of Matrix numbers to locate Matrix 428 and also refer to the Guide to Effective Use of the CANSIM Mini Base Series Directory (page iii). The first series in Matrix 428 is "All-Items"; to the right of the series title we have 14-01-00 – this indicates that the data is available starting January, 1914. The Databank Identification Number for the series appears to the right of "PUBLIC"; this number is used to retrieve the data. "STC5 4302" is the agency and section responsible for this Matrix; should you have questions concerning concepts, methods, limitations, etc. of this series, please refer to the Inquiries List (Appendix B) for the name and telephone number of a person to contact.

* The CANSIM Identification Number (Matrix and series number), or the Databank Identification Number may be used to order series from CANSIM.
